自我陈述/ Personal Statement		I am Uddin Sahab, a master’s student in Software Engineering at Southwest University of Science and Technology (SWUST). My research focuses on artificial intelligence, deep learning, and software system development. I have published research on advanced AI applications, including “A Deep Learning-Based Approach to Classification of Hematological Diseases” and “Social Media Post Detection Using Natural Language Processing and Machine Learning Classifiers,” which was accepted by IEEE. My current thesis, “Climate Forecasting System Based on Deep Learning and Multi-Sensors,” aims to build an intelligent model for accurate temperature prediction. This scholarship would be a great encouragement for me to continue improving my research, pursue academic excellence, and contribute meaningfully to the university’s research community.				
证书/获奖/科研成果 Certificates/Awards /Scientific Achievements		1: A Deep Learning-Based Approach to Classification of Hematological Diseases explored the use of neural networks for medical image analysis. 2: Social Media Post Detection Using Natural Language Processing and Machine Learning Classifiers
